Descrizione :

Not to underestimate!
Allowedly, expressions such as "small but nice" or "trinket" sometimes tend to be overworked, but in case of our active OMNITRONIC EG-30A speakers, exactly this description is really true and justified. Because the said pair of speakers impresses with its modern, attractive design, the compact appearance, the outstanding value for money and - if it was not enough yet - with its amazing good properties of sound. Although you might not expect it upon first sight, but concerning the sound, the little speakers talk big and do not leave anything to ask for and are doubtlessly able to play back more than just gentle background music. By the way, the speakers can also be ordered in white and as passive version.
