

OMNITRONIC VC-11 Volume Controller, passive

Passive monitor controller with mute and mono summation

Réf. : 10355796

GTIN: 4026397743883

Description:

The VC-11 is a passive stereo monitor controller for professional computer-based studio applications and home use. It is designed for a precise volume control of analog audio signals and is inserted between analog signal sources and active speakers or amplifiers, e.g. between a PC sound card and monitor speakers. It is ideal for quick and easy level control when you monitor the audio output of your PC sound card or DAW (digital audio workstation).

Using a large rotary control, the VC-11 lets you attenuate volume levels conveniently and you no longer have to rely on a mouse and screen. Reducing level from your software only reduces the audio bit depth. The signal path is completely passive and does not require power supply. The VC-11 simply delivers an attenuated signal without compromising your audio which is one of the main benefits of passive volume attenuation. Thus, you can keep your software masters at unity and attenuate the audio to your active monitors precisely with the VC-11 while maintaining maximum audio resolution.

The VC-11 features balanced combined XLR and 6.3 mm jack inputs and 6.3 mm jack outputs, plus mini jack connectors as well as mute and mono switches. It will fit any desktop thanks to its compact size.

Caractéristiques:

- Réglage précis du volume des signaux audio analogiques
- Convient par exemple entre la carte son du PC et les haut-parleurs actifs ou les amplificateurs
- Grand réglage de niveau
- Passif, ne nécessite pas d'alimentation électrique
- Boîtier du pupitre

Logistique

EAN / GTIN: 4026397743883

Poids: 0,69 kg

Longueur: 0,24 m

Largeur: 0,17 m

Hauteur: 0,07 m

Données techniques:

Plage de fréquence:	20 - 20000 Hz
Couleur du boîtier:	Noir mat
Connexions:	Entrée: Line via 2 x câble jack XLR/6,35 mm 3 broches (F) prise combo version encastrable Entrée: Line via 1 x Prise jack 3,5 mm (stéréo) version encastrable Sortie: Line via 2 x Prise jack 6,3 mm (mono) version encastrable Sortie: Line via 1 x Prise jack 3,5 mm (stéréo) version encastrable
Canaux:	Canal d'entrée: 1 x Mono + Stéréo via XLR ou câble jack, commutateur mono stéréo, commutateur muet Sortie maître: 1 x Mono + Stéréo via câble jack, réglage du canal via bouton rotatif
Conception du boîtier:	Boîtier du pupitre
Dimension:	Largeur : 16 cm Profondeur : 10,8 cm Hauteur : 6,3 cm
Poids:	0,510 kg

Contenu de la livraison:

1 x Appareil
