Description:

In our latitudes, lemon trees are usually found as attractive decorative plants for patios, balconies and conservatories. A good and decorative alternative to the non-winterproof originals from nature is the artificial lemon tree from Europalms. Its crown consists of numerous branches with textile leaves that can be easily bent into the desired shape. Trunks of natural wood with lianas make the plant look deceptively real. Ripe citrus fruits made of plastic round off the Mediterranean appearance. The lemon tree is already supplied in a basic gardener's pot, which gives the plant a stable stand when placed in a cachepot.
