The article is no longer in our assortment.

Description:

Your trump card
The card players have offspring. With the SDP-3, OMNITRONIC introduces the third and most modern family member. Technically speaking, the SDP-3 offers the same basis as its predecessors, but naturally with a novelty to boast of. In this case: a USB-port. Our newest player has been equipped with this feature, as opposed to the SDP-2. It now provides the opportunity to play music via SD- and SDHC cards or USB-storage mediums - a rather satisfactory assortment. Apart from that, the player persuades with its comprehensive functions, the well-arranged design and the user-friendly handling. At the same time, the SDP-3 is in no way inferior to other fully equipped CD-players. On the contrary! By virtue of Solid State storage technology, the "Anti-Shock" function is no longer necessary, as mechanical interferences no longer influence the play-back. Additionally, up to 6400 titles can be saved onto a single CD, depending upon storage capacity. The SDP-3 is not only for those, wishing to do without unwieldy CDs. It's perfect for those who value a high quality play-back-unit.

Logistic

EAN / GTIN: 4026397375619
Weight: 2,40 kg
Length: 0.58 m
Width: 0.15 m
