### Description:

Mirror balls look best when illuminated with a highly focused beam of light. The Eurolite TCL-450 is ideal for this purpose: The TCL-450 is equipped with a powerful white light source that produces a sharply defined, focused white beam. Various color filters are available for color effects, and they can also be locked into intermediate positions.

The beam angle can also be optimally adjusted to the size of the mirror ball using various reducing gobos.
