

FUTURELIGHT PRH-540-2 Pro-Rotating-Holder

Goodbye to immovability

Art. No.: 51837615

GTIN: 4026397230024

The article is no longer in our assortment.

Description:

Get it movin'! Due to the PRH-540-2, classic lighting elements as smoke-machines or audience-blinders can perform up to two and a half turns. As a consequence, they can be used pretty variably. The light-effects are carried by a rotating plate. Despite of the turns, there should be no fear of cable spaghetti; because the blinders or smokers are connected directly beneath the plate. With this technology there are no problems with the transmission of DMX-signals.

Features:

- Base with rotary plate for mounting smoke machines, lighting effects and much more
- Ideal for a wide range of applications: fairs and exhibitions, sales promotion in movie theatres, theatres and discotheques
- A DMX output, separate power outlet and signal output for an external tilt motor allow for the application of a wide range of devices
- Applicable for 15 kg maximum tearing load or 10 kg maximum pressing load
- Soft rotation in both directions
- Exact positioning via 16 bit Pan movement resolution
- Automatic correction of the Pan position
- Control board with 4-digit display and foil-keyboard for adjusting the DMX-starting address, Pan-Reverse, Program, Reset
- DMX-controlled operation or stand-alone operation with Master/Slave function
- DMX control via every standard DMX controller
