Description:

Moving Moments

Even if conventional illuminants are slowly but surely giving way to LEDs, in the Moving-Head arena they are still something of a rarity. Yet even here they prove their versatility. Our FUTURELIGHT DJ-LED Head Spot, equipped with 37 LEDs (0,5 W), is a prime example. These highly luminous LEDs project via a matrix the most various RGB motifs such as pictures, forms, numbers or small animations. And all this in a maneuverable spot, constantly changing directions, consequently illuminating an entire room. The luminosity of the LEDs is really remarkable. Equally remarkable is the lifetime of approximately 100000 hours, making maintenance nearly a thing of the past. Considering these facts, and the evocative colorful results, one can easily attest that LEDs will soon feel quite at home on the unaccustomed terrain.
