Decorative ornamental grass featuring uniquely patterned leaves

GTIN: 5055183945520

List price: 117.81 €

incl. 19% VAT.

Description:

Ornamental grasses are highly valued for bringing a modern, natural, and relaxing atmosphere to interior spaces. The artificial Zebra Grass (FIRESILX) achieves this with exceptional style, thanks to its distinctive foliage pattern that makes it a true eye-catcher.

Its name comes from the yellow-green horizontal bands that appear at regular intervals along the slender blades, creating its characteristic zebra-like appearance. This unique variety of Miscanthus combines a natural look with striking visual appeal and adds elegant accents to contemporary interior concepts. Standing 140 cm tall, Zebra Grass is ideal for wellness areas, spa environments, hotel lobbies, reception spaces, and modern office or lounge settings. Its slender growth habit provides both structure and visual lightness, making it a perfect complement to modern interior styles. After placement, the grass naturally settles into its characteristic shape, allowing it to achieve its full decorative effect with minimal effort.

Thanks to its flame-retardant B1 construction, Zebra Grass is also suitable for environments with elevated fire safety requirements. In public facilities, hotels, trade show installations, retail spaces, and prestigious commercial interiors, this decorative ornamental grass provides attractive greenery solutions even where specific fire safety regulations must be observed.

The plant is supplied with a basic nursery pot that provides stable support when placed inside a decorative planter.

Features:

- Improved version with more than predecessor model
- B1 low flammability; Class B, s2, d0 low flammability
- Complies with DIN 4102-1 and EN 13501-1
- Falls in shape by itself
- The article is delivered ready to stand

Logistic

EAN / GTIN: 5055183945520
