Description:

Set targeted green accents in your office and business premises with the artificial ivy from Europalms!

Especially in the professional environment, the focus of the furnishings is usually on functionality. Here, the slender climbing plant forms a beautiful contrast and loosens up the overall picture.

A special feature of the popular houseplant are the alternate, heart-shaped foliage leaves in strong green. As a support and climbing aid serves a rod, which is incorporated in the nursery pot. The lush, long tendrils grow up to a total height of about 180 cm.

Even if only little space is available, such a room greening can be implemented with a few simple steps.
