

EUROPALMS Hydroculture substrat, brown

The ideal filler material to stabilize plants

Art. No.: 83011005

GTIN: 4005633161612

List price: 11.78 €

incl. 19% VAT.

Description:

This classic is used to improve the drainage of real plants or as a substrate for hydroponics. For artificial plants, the clay granulate is mainly used as filling material to stabilize the plants in the plant container or to cover pots and plant troughs. The expanded clay balls have a diameter of 8-10 mm and are supplied in a 10-litre bag.

Features:

- Hydroponic pellets
- Suitable for outdoor use
- Made in Germany

Technical specifications:

Storage capacity:	10 l
Material:	Expanded clay balls
Color:	Brown
Weight:	3,75 kg
