Description:

Dense forests have always held a mysterious fascination. Between gnarled trunks, deep shadows, and drifting mist, a single sound is often enough to set the imagination racing. But what if it is not just the forest that feels alive? What if one of its ancient trees suddenly awakens?

Standing approximately 2.70 meters tall, the animated Monster Tree by EUROPALMS towers over almost any Halloween display and commands attention from afar. Its massive trunk appears weathered by time, while long, tattered strips of fabric hang from its outstretched branches like decaying limbs. Its menacing face, complete with sharply defined teeth and deeply sunken eyes, looks as though it has remained motionless in the forest for decades, waiting for the perfect moment to strike.

For an even more dramatic display, the tree's arms can be bent and posed individually. As soon as the animation is activated, the giant Monster Tree slowly comes to life, turning ominously toward its next victim. At the same time, LEDs embedded in its face begin to flash with an eerie glow. A sinister voice echoes from deep within the trunk, accompanied by evil laughter and ghostly sound effects. The combination of movement, lighting, and sound creates the chilling illusion that this ancient forest giant has been waiting all along to lure unsuspecting visitors into its dark domain.

With an animation cycle of up to 75 seconds, the Monster Tree becomes an imposing centerpiece for any Halloween party or display.
