Description:

A light snake of the upper world!

A word such as "multifunctional" is frequently used, almost inflationary. But if we relate this attribute to our silicon ribbon, it is absolutely justified. After all the ribbon has a lot to offer. It is totally flexible, adapts to various shapes easily and therefore offers you the chance, to give full scope to your creativity. Whether for window decoration, logos, trade fairs, product presentations, your own party cellar, for interior or exterior use and so on. In regard to our silicon ribbons, these numerous fields of application are given and clearly state that multifunctionality is applicable. The 99 beaded LED's are available in 4 different colors and with 2 white color temperatures - additionally to this 100cm version there is also a smaller one with 35 cm.
