Description:

The Phoenix Palm from Europalms is the ideal companion for trade fairs or events where there is often not much time for elaborate decoration.

The tuber trunk of this phoenix palm is made of high-quality plastic, reinforced with glass fibre, and also serves as a stand. A cumbersome potting into a cachepot is therefore no longer necessary and the artificial tree is quickly ready for use.

The fronds have a stable shaft made of metal and are simply plugged in. From the bottom to the top of the leaf, the plant has a total height of approx. 240 cm. If a flame retardant treatment according to DIN 4102/B1 is required, the textile leaves of the fronds can be treated with an appropriate fire protection spray.
