Descrizione :

You are looking for the perfect light effect for a small room or club? The Mini Double Ball by Eurolite offers not only one but two rotating disco balls with a total of six RGB LEDs emitting light in all directions. Each ball rotates around its axis while producing red, green and blue light and projecting it into the room through the faceted surface. The MDB-12 does not require any setup: Just plug it in and enjoy the show! The modern LED technology also makes for a particularly low energy consumption which makes the Double Ball perfectly suitable for frequent use. At the bottom of the MDB-12 you find a useful bracket for lifting and carrying the extra-light device: The housing is made of particularly light plastic so you can transport your own little pocket LED disco from A to B in no time. If you are looking for an atmospheric light effect without extensive setup, the MDB-12 is the right choice!
